DETAILED ACTION

Claims 1-55 are presently pending in this application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 3-42, drawn to a method for increasing alcohol production, classified in class 435, subclass 161.
- II. Claims 2, 4-42, drawn to a method of increasing growth of a cell, classified in class 435, subclass 244.
- III. Claims 43-47, 52, 54, drawn to a growth medium, classified in class 435, subclass 253.6.
- IV. Claims 48-51, 53, 55, drawn to a fermentation reaction mixture, classified in class435, subclass 252.8.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are patentably distinct from each other. The method of increasing alcohol production of group I, the method of increasing growth of a cell of group II, are unrelated as they comprise distinct steps, utilize different products and produce different results. The groups have acquired separate status in the art and separate fields of search as further evidenced by their separate classification.

Inventions I and III are related as process of use of a product. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the

Art Unit: 1652

product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product, a growth medium, can be used to grow other microorganisms apart from its use to improve fermentation.

Inventions IV and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the fermentation reaction mixture can be used to support the growth of the microorganism only as opposed to its use as fermentation medium.

Inventions III and IV are patentably distinct from each other. The growth medium and the fermentation reaction mixture are chemically different from each other and the use of each leads to a different product. They are subject to separate manufacture and sale.

Inventions III, IV and II are patentably distinct from each other. The growth medium for improved fermentation and the fermentation reaction mixture are neither used nor made in the method of increasing the growth of a cell, of group III. They are subject to separate manufacture and sale.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
